It's pleasant to find such a steady concourse of people thronging the Store creating the busy hum of business, carrying on their faces the pleased expression of satisfaction at the opening of our great new Grocery section.

We've been swamped for two days on the delivery business, until yesterday afternoon we put on seven big transfers and other wagons, and for the first time we've seen daylight through it.

"Well, we're glad you've opened a Grocery Department so we can come here and buy everything together."

Board of Trade Adopts a Resolution Condemning the Efforts Being Made to Abolish the Stock Yards Postal Station-Victims of Drink.

The examination of pupils of the grammar grades for diplomas has been com-pleted by the teachers of the various schools of this city and the report shows that 105 passed the examination and are now eligible to enter the high school. Vesterday was the last day of the first

term of school for this year, and those pupils who were granted grammar school liplomas and expect to enter the high school were received by the pupils of the high school. The reception lasted half an hour, and this interesting programme was carried out:

Superintendent Hanks made some remarks that were interesting to the pupils. Among other things he said:

"Heretofore no special emphasis has been given to this promotion, more than to any other promotion in the primary or grammar grades. But it is my opinion there should have been. To complete the course of study in a system of schools like ours, in the grammar grades, means much more than many people think. It means at the very least eight years of hard work, and, as a rule, good behavior, a little 'sunshine' and much shadow.

"To some it means even more. To some it may represent a great sacrifice to parents in keeping their children in school these eight years, while their services were needed in the support of the family. This sacrifice on the part of parents is threefold in its character. First, that they may elevate and ennoble the child for its own sake; second, that they may perpetuate the good name and deeds of the family; third, that they may better society and government by giving to the nation a worthy clitzen."

EMPLOYMENT FOR PRISONERS. County Board Will Consider a Proposition

to Establish a Rock Pile. 524-526-528 Minnesola Ave.,
KANSAS CITY, KANSAS.

The board of county commissioners will meet this afternoon when the question of establishing a rock pile to furnish employment to the prisoners now in the county jail will be discussed. Commissioner Merrill, at the last meeting of the board, was

appointed to look into the matter and find out what could be done. He has prepared a report showing where the rock like can be established, where the rock can be secured and what disposition can be made of it. His plan is to use the rushed rock on the county roads. The county must bear the expense of feeding the forty or first prisoners always in jail for minor offenses and at the present time it gets nothing in return. In the event a rock pile is established the prisoners can be made to earn their own living. It is argued that it will also lesson g. It is argued that it will also lessen line in the county, for many crimes are multied because the persons commit-ing them would rather spend their time jail than to work for a living.

Meeting of Real Estate Agents to Be

The Leavenworth Real Estate Association has issued invitations to the different real estate agents of this city to attend a conference of real estate agents and dealers of Kapsas, to be held in that city or January 22. The committee on arrangements offer the following reasons for the meeting: First—The advisability of forming a state real estate association. Second—The amount of commission that ought to be charged on sales, and suggest a law that would protect the agent onleads him to collect his commissions. Third—To suggest a change in the redemption clause of the present mortgage law, and make it to conform with the mortgage laws of other states. "To build up Kansas we must be able to borrow money. The present mortgage law keeps money out of the state." Fourth—To suggest a change of the law that taxes mortgages. At the present time real estate pays tax and the mortgages are taxed, thus collecting double taxes from the same property. A repeal of this law would reduce the rate of interest and help the borrower. Fifth—To discuss other matters of interest in connection with the real estate business.

There will be a banquet held on the evening of January 24. Mr. Mac Armistrons, of this city, has been invited to prepare a paper on the subject, "Real Estate Agents as a Factor." It is expected that there will be quite a large number of real estate dealers of this city attend the meeting. Held in Leavenworth. The Leavenworth Real Estate Associa-
